EDUCATION

IES College of Technology

B.Tech in Computer Science & Business Systems | CGPA: 7.78

Bhopal, MP

2023 – 2027

Coursework: Data Structures, Algorithms, computer networks, DBMS, Operating Systems, OOP

EXPERIENCE

Sammunat LLC

Full Stack Web Development Intern

Remote

Dec 2025 – Jan 2026

- Developed and deployed **full-stack client websites** end-to-end using **Next.js**, **React**, and **Node.js**, handling both frontend UI and backend API integration.
- Built production-ready web applications with **responsive design**, **REST API** integration, and **database connectivity** tailored to real client requirements.

Agastya International Foundation

Volunteer Full Stack Developer & Tech Mentor

Bhopal, MP

Aug 2025 – Feb 2026

- Built a modular full-stack platform for educational resource distribution serving remote student populations.
- Mentored **50+ students** in DSA, bridging theoretical concepts with production-level coding practices.
- Led frontend architecture achieving **100% mobile responsiveness** and 15% SEO improvement using **Tailwind CSS**.

PROJECTS

DPI Engine – Deep Packet Inspection System | C++17, PCAP, Multi-threading, TCP/IP, TLS

2026

- Engineered a network traffic analyzer that inspects raw PCAP packets to classify application-layer traffic (YouTube, Facebook, etc.) and enforce IP/domain/app-level blocking rules, similar to enterprise firewall systems.
- Parsed **Ethernet/IP/TCP** headers from raw bytes and extracted **TLS SNI** fields from Client Hello messages to identify encrypted HTTPS destinations without decryption.
- Built a **multi-threaded pipeline** with Load Balancer and Fast Path thread pools using **mutex + condition_variable** based thread-safe queues and consistent hash-based flow routing for stateful per-connection tracking.

Gradify – Student Learning Platform | React, Node.js, Express.js, MongoDB, JWT |

2026

- Built a role-based MERN platform centralizing course management, assessments, attendance tracking, and AI-powered doubt support for students and instructors.
- Designed **REST APIs** with **JWT authentication**, modeled **MongoDB** schemas for complex academic workflows, and integrated **Groq AI API** for intelligent doubt resolution and **Web Push (VAPID)** for real-time notifications.
- Deployed end-to-end on **Netlify + Render + MongoDB Atlas**; won **1st rank** at NavKalpana Hackathon competing against multiple college teams.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React, Next.js, Node.js, Tailwind CSS

Databases: MongoDB, SQL

Tools: Git, GitHub, Docker, Postman, Vercel

Concepts: REST APIs, Multi-threading, TCP/IP Networking, System Design, OOP, DSA

ACHIEVEMENTS

- **NavKalpana Hackathon – 1st Place:** Built *Gradify*, a full-stack student learning platform, ranked 1st among competing college teams.
- **Competitive Programming:** Codeforces Pupil | CodeChef 3-Star | HackerRank 4-Star | **600+ problems** solved across LeetCode, Codeforces, and CodeChef. | [Codolio](#)
- **Microsoft Azure Essentials** certified in cloud fundamentals. | [Certificate](#)
- **IEEE SCEECS'25:** Selected participant at the IEEE MANIT International Conference. | [Proof](#)
