EDUCATION

IES College of Technology, Bhopal

2023 – 2027

B.Tech - Computer Science and Engineering - **CGPA - 7.78**

Bhopal, Madhya Pradesh

EXPERIENCE

Sammunat LLC

Dec 2025 – Jan 2026

Full Stack Web Development Intern

Remote

- Developed and deployed full-stack client websites end-to-end using **Next.js, React, and Node.js**, handling both frontend UI and backend API integration.
- Built production-ready web applications with responsive design, REST API integration, and database connectivity tailored to real client requirements.

Agastya International Foundation

Aug 2025 – Feb 2026

Volunteer Full Stack Developer & Tech Mentor

Bhopal, MP

- Built a modular full-stack platform for educational resource distribution serving remote student populations.
- Mentored 50+ students in **DSA**, bridging theoretical concepts with production-level coding practices.
- Led frontend architecture achieving 100% mobile responsiveness and 15% SEO improvement using **Tailwind CSS**.

PROJECTS

Context-Aware AI Chat Engine | Python, LLM APIs, Prompt Engineering, RAG

2026

- Architected a context-aware conversational AI engine leveraging LLM APIs with structured prompt engineering to maintain stateful multi-turn dialogs.
- Implemented a modular retrieval and memory pipeline for real-time document context injection, drastically reducing hallucination rates.

DPI Engine – Deep Packet Inspection System | C++17, PCAP, Multi-threading, TCP/IP, TLS 2026

- Engineered a C++17 network analyzer inspecting raw PCAP packets to classify application traffic and enforce IP/domain-level blocking rules.
- Parsed Ethernet/IP/TCP headers and extracted TLS SNI fields from Client Hello messages to identify encrypted HTTPS traffic without decryption.
- Built a multi-threaded pipeline with thread-safe queues and consistent hashing for stateful per-connection flow tracking.

Gradify – Student Learning Platform | React, Node.js, Express.js, MongoDB, JWT, Groq AI

2026

- Built a role-based MERN platform for course management, attendance tracking, and integrated Groq LLaMA-3 API for automated AI doubt resolution.
- Designed REST APIs with JWT authentication, modeled MongoDB schemas, and deployed on Netlify + Render; won 1st rank at NavKalpana Hackathon.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL

Technologies/Frameworks: HTML5, CSS3, React, MongoDB, Express, Node.js,

AI & ML Concepts: LLM API Integration, Prompt Engineering, RAG (Retrieval-Augmented Generation), Embeddings, Vector Databases

Developer Tools: Git, GitHub, Docker, Postman, Vercel

Concepts: REST APIs, Multi-threading, TCP/IP Networking, System Design, OOP, DSA

ACHIEVEMENTS

- NavKalpana Hackathon – 1st Place:** Built Gradify, a full-stack student learning platform, ranked 1st among competing college teams.
- Competitive Programming: Codeforces specialist** | **CodeChef 3-Star** | **HackerRank 4-Star** – Solved **800+** problems across LeetCode, Codeforces, and CodeChef. [Codolio Profile](#)
- Microsoft Azure Essentials:** Certified in cloud fundamentals. [Certificate](#)
- IEEE SCEECs'25:** Selected participant at the IEEE MANIT International Conference. [Proof](#)
